

RECYCLING DONE RIGHT

Apartments & Condominiums • Your guide to recycling in Clark County

4 tips to Recycle Right!

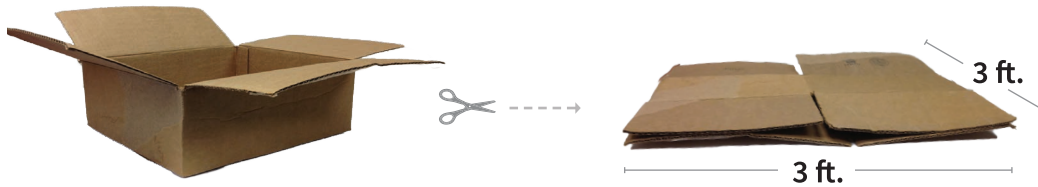

1 When in doubt, find out! Even if a package or container is labeled “recyclable” it might not be here in Clark County. Follow the provided guide or check out the **A-Z Recycling Directory** at wcnorthwest.com. Use the A-Z search function on the **RecycleRight** app for fast and convenient answers, right at your fingertips. Download the RecycleRight app to your Apple or Android smartphone or tablet for FREE!

2 If you’re not sure where it goes, it’s OK to put it in your garbage! Don’t want to clean that container? Throw it in the garbage.

3 Make sure all containers are **empty, clean, and dry**. A rinse and shake will do!

4 Cut or fold down large cardboard boxes.

Glass recycling

The only glass that goes in the glass recycling cart are **bottles and jars that once held food or a liquid**.

Glass must be loose in the glass recycling cart. Do not bag glass. Please do not put empty glass back in paper drink carriers, paper bags or plastic bags before placing it in the glass recycling cart.

NO: lightbulbs, candles, broken glass, glassware (canning jars, drinking glasses), ceramics, “flat” glass (windows, mirrors, table top glass, aquarium glass)

To bag or not to bag?

Bag trash! All garbage must be bagged in plastic and securely tied.

Do not bag recycling in plastic!* Recycling must be loose in the cart.

Using a paper bag to hold recyclables is OK, but a **reusable tote bag** to empty and bring back inside is better!

* Please note: Some plastic bags are marketed as “recycling bags” but these cannot be recycled. These types of bags are garbage and should never be put in the recycle cart.

Household Hazardous Waste (HHW)

Many common household items contain hazardous or toxic chemicals. These items are prohibited in the garbage and down the drain.

Household batteries

Automotive batteries, oils, fluids, and filters

Medications, syringes, sharps

Household cleaners

Many electronics contain heavy or precious metals that are toxic if disposed of incorrectly. This list of electronics is illegal to put in the garbage, but have numerous drop off locations to be recycled for free: televisions, laptops, monitors, tablets, e-readers, and portable DVD players.

Find the list of drop off locations on the A-Z Recycling Directory at wcnorthwest.com.
